Why just listen to reasons?

COME SEE FOR YOURSELF!

THIS TIME we'd like to tell you about something that you cannot see in this picture—something, in fact, you cannot know about from looking at someone else in a passing Buick—or from viewing a Buick on our showroom floor.

It's the feel you get from a Buick in motion.

You are going to find out that it is something like traveling on your own private, jet-propelled cloud—only firmer.

Maybe you know a stretch of washboard road, where you have to slow down, or bounce and jitter.

Try that in a Buick and see how you keep a level, comfortable boulevard smoothness.

Maybe you're always on edge to dodge dips and chuckholes. Those also lose

most of their jolt when you're at the wheel of a Buick—or in the rear seat.

In a few simple words—the ride of any Buick—SPECIAL, SUPER or ROADMASTER—is out of this world.

We could give you a lot of reasons. Soft coil springs on all four wheels, for example—the firm linkage of the torque-tube drive—the distribution of weight—big soft tires on wide rims—the way Buick engines are mounted.

ONLY BUICK HAS Dynaflo— AND WITH IT GOES:

HIGHER-COMPRESSION Fireball valve-in-head power in three engines. (New F-263 engine in SUPER models.) • NEW-PATTERN STYLING, with MULTI-GUARD forefront, taper-through fenders, "double bubble" taillights • WIDE-ANGLE VISIBILITY, close-up road view both forward and back • TRAFFIC-HANDY SIZE, less over-all length for easier parking and garaging, short turning radius • EXTRA-WIDE SEATS cradled between the axles • SOFT BUICK RIDE, from all-coil springing, Safety-Ride rims, low-pressure tires, ride-steadying torque-tube • WIDE ARRAY OF MODELS with body by Fisher.
