PAYS FOR YOUR SHOWER BATH

That's how little it costs to heat 5 gallons of water automatically, at Idaho Power's low electric rates. If you prefer a tub bath instead, you'll need 10 gallons of hot water. At the bargain price of 5¢ for a penny, that's only 2¢.

Next to light and heat, hot water is the greatest single necessity in your home. Even if the average use were 50 gallons daily—which it isn't—you could heat it all for a dime... ELECTRICALLY.

With an automatic electric water heater you can use as much hot water as you like, and there's always more ready for you at the turn of a tap.

A 52-gallon tank is recommended for the average family... then there's a reserve for any emergency. Consult your dealer for the size and model suited to your home.
