Take It From Me... Folks!

IT'S NEW! IT'S WONDERFUL!
IT'S PAINT-SHIELD!

"Paint-Shield" is the original liquid masking tape—just brush it on glass—paint over it—and then—peel it off like Tape!

But that's not all! "Paint-Shield" leaves a lasting, protective film where glass and sash meet—keeps paint from chipping!

So take it from me, it's great! Come in and see for yourself how "Paint-Shield" takes the "pain" out of window painting.

Yours sincerely,

GOOD Farm Buildings Are EASY to GET at Boise Payette

Well Tended Flocks Mean Better Farm Profits

As every poultryman knows egg production depends upon the care and housing given his flock nearly as much as on the feeding program. That's why a GOOD Laying House is so important.

This Gable Roof Laying House (No. 1451) —is typical of the soundly-engineered farm buildings which are possible with plans from the big 4-Square Farm Building Book at Boise Payette. It is a 20 x 20 structure with a capacity of 100 to 135 birds. It has a straw loft with screen louvers in gable ends, a ridge ventilator and baffle board at ceiling line. Thus, any desired movement of air is possible, free from draft, which means warmth in winter, coolness in summer.

When additional quarters are needed similar 20 x 20 units can be added. However, they should be separated by a 10-ft. storage and feed room. Plans for its construction are also available.

At your local Boise Payette yard you will find a large selection of plans and specifications for all types and sizes of farm buildings... buildings which are practical and economical... buildings which have been thoroughly tested in actual use.

Before you build any farm building visit Boise Payette where you can not only secure the plan you want and the materials you need but also aid in choosing a competent contractor and valuable help in arranging the necessary financing.
