TIMELY LIGHTING TIPS

For Proudful Parents...

1- NIGHT Day is done and dinner's done—high time to get that school-work done. Boys and girls work best when they have a regular study corner—and proper lighting to go with it.

2- LIGHT Study lamps need 100-watt or 150-watt bulbs to insure adequate light for reading and close work. An evenly lighted room with auxiliary lighting on the desk is best. But avoid glare and shadow.

3- BRIGHT Better grades are just one reward of good lighting. Proper size bulbs and plentiful light help to assure good eyesight through the growing years ahead. And good eyesight means more energy and better health.

You can help your children with their studying the easy way... Just provide a proper setting for it! Good lighting is most important—it helps boys and girls learn their lessons with less effort—and in less time. Stock up now with a few extra cartons of light bulbs. They can keep empty sockets filled... and your house bright and cheerful through the long autumn evenings ahead. Most retail stores carry light bulbs. Buy them when you shop.

Better Buy Buick!

PERHAPS you've noticed that there seem to be a lot of these brawny beauties running around on America's highways—and it isn't just that boldly gleaming fore-front that spreads this impression. It isn't just the fact that folks who own a Buick get such a bang out of it that they do a lot of driving. Back of all this is another fact. It's a fact that contains a broad hint to anyone who'd like to know what's what in motorcar buys. 1950 Buicks are breaking all past popularity records, as registered in sales.

So we suggest that you do some personal investigating. Find out, for example, how mas-

terful you feel, with Fireball power purring away the miles, at a polite touch of your toe on the gas treadle.

Find out how the jolts and jars seem to disappear, when you have big soft coil springs on all four wheels, and fat low-pressure tires on wide Safety-Ride rims.

Then there's Dynaflo Drive,* which Buick owners vote the biggest automotive hit that has come along in years.

With all this, there's room, and comfort, and road-hugging heft combined with a light and willing response to your hand on the

*Standard on Roadmaster, optional at extra cost on Super and Special models.

wheel—and prices that start down with the sixes.

Seems like almost everyone wants to own one of these Buicks—and most people can. How about you? Isn't it a smart idea to see your Buick dealer now and get your name on his list?

Only BUICK has Dynaflo—
and with it goes! **HIGHER-COMPRESSION** and **valve-in-head** power in three engines. (New Fireball valve-in-head power in three engines. (New F-263 engine in SUPER models.) • **NEW-PATTERN** styling, with **MULTI-GUARD** fenders, less over-through fenders • **TRAFFIC-HANDY** size, less over-length for easier parking and garaging, short all length for easier parking and garaging, short turning radius • **EXTRA-WIDE SEATS** cradled between the axles • **SOFT BUICK RIDE**, from all-coil springing, Safety-Ride rims, low-pressure tires, ride-steadying torque-tube
