Want a long run for your money?

Better Buy Buick!

You want a new car to be tops in things like style and room and comfort and power—and a thrill-packed fifteen minutes with the nimble number pictured here will show you it has all these things in abundant measure. So you ask us—how about money? What does it cost to buy a Buick—and to own one?

All right—let us ask you some questions. **Take first cost.** Do you know that Buick prices start down at a level

below what you'd pay for some sixes—and that every Buick, on a cents-per-pound basis, is a stand-out buy?

Take operating cost. Do you know that the bang you'll get from Buick's Fireball power comes from a valve-in-head engine—recognized by engineers as a thrifty saver of fuel?

Do you know that owners of 1950 Buicks are writing us rave letters, saying that this year's version is the most economical Buick ever built?

Do you know that such comfort features as coil springs on all four wheels protect the car as well as the passengers—and throw in an

extra saving because they need no servicing, and are practically breakproof to boot?

Do you know that Dynaflo*—in addition to keeping you fresh as a daisy on a day-long drive—caps its convenience with savings on tires, cuts down the strain on transmissions and engines—and eliminates all friction clutch repairs, because it hasn't any?

Take final cost. Do you know that when the owner of a Buick gets a yen for a later model, the prices that Buicks command on a used-car lot are the ultimate proof of their long-run value?

So if you want a real run for your money, better buy Buick. And the first step is very simple: Go see your Buick dealer—soon—and get an order signed.

* Dynaflo Drive is standard on ROADMASTER, optional at extra cost on SUPER and SPECIAL models.

FOUR-WAY FOREFRONT—This rugged front end (1) sets the style note, (2) saves on repair costs—vertical bars are individually replaceable, (3) avoids "locking horns," (4) makes parking and garaging easier.
