Alkaline Soils Need

GEY-SUL

SULPHUR-GYPSUM SOIL CONDITIONER

Now you can get Gey-Sul sulphur-gypsum soil conditioner. Now you can learn why so many farmers throughout the West use and praise this "magic key" to soil fertility.

GEY-SUL is a natural combination of free sulphur and calcium-sulphate (gypsum). Gey-Sul contains: 20% free sulphur, 60% calcium-sulphate, 90% total usable minerals, guaranteed minimum of 30% free and combined sulphur, less than 1% moisture.

GEY-SUL neutralizes alkali and opens up soil so that the sodium salts will leach away. Gey-Sul reduces pH, and helps restore normal productivity to barren lands. Gey-Sul "unlocks" vital plant foods now in your soil but unavailable. Gey-Sul supplies calcium, sulphur, and other valuable minerals to your soil. Gey-Sul stimulates legume growth. Gey-Sul builds up resistance to many plant diseases and pests.

MAKE A CHECK PLOT
AND FIND OUT FOR YOURSELF
It may seem hard to believe that Gey-Sul will provide so many benefits for your soil and crops. Why not make a check plot and find out for yourself? When you see the improvement in yield and in quality on your own ground, we know you will join the thousands of Western farmers who are rebuilding their soil with Gey-Sul. Spread Gey-Sul on alfalfa, clover and pastures. Your stock will know the difference!
