The answers to everyday insurance problems*
By Golan C. Calvert

Believing wholeheartedly in the philosophy that you have to "give" before you can "get" and believing also that in these days of complexities most people will be really interested in reading the solutions to their own and their neighbors' everyday insurance problems, we decided to try something a little different.

Beginning next week this advertising space will be devoted each week to a column of questions and answers on insurance problems which are common in the lives of all of us.

Frankly, this column will be in itself a form of advertising but the offer to answer your insurance questions without charge or obligation is genuine and has no strings attached. We'll really appreciate an opportunity to be of service to you.

* If you'll address your own insurance questions to this office, we'll try to give you the correct answers and there will be no charge or obligation of any kind.
