THAT NEW YEAR'S HANG-OVER

As the last drop gurgles from the national liquor bottle and the heads begin to swell on this 31st of December, 1951 we can realize what a drunken brawl we have been in during the last 10 years and hope that we will be relieved of the headache during the next year, although the hope is rather forlorn.

The best wishes we could express for 1952 would be for peace on earth and a return to common sense in Washington, D. C. No one has ever been on a bigger drunk while bidding adieu to the old year and welcoming the new year than the bunch in Washington. This sounds like it is going to be a radical editorial, but its principal purpose is to point out the need of some conservative thinking on the part of Americans during the next few months.

The present administration in Washington, dating from April 30, 1945, has collected from its citizens more money in domestic taxes than has been collected by all the presidents in the history of the United States from the inauguration of George Washington in 1789 to the time Harry S. Truman became president of the United States. During the Truman administration, the government has collected from its citizens in taxes 260 billion dollars and during the administrations of all other presidents of this country, the government collected 248 billion dollars.

And, unless the American people do something about the situation, the expenses will become worse. Financial experts have announced that when congress convenes in January there will be presented an additional confiscatory tax bill, taking 6 to 10 billion more dollars from the American people or creating more deficit spending of from 12 to 16 billion during the next fiscal year, resulting in further inflation. The inflation has already shrunk the value of the dollar to 55 cents and if action is not taken it may drop to 35 cents or less.

Let's all send to our representatives in congress new year's greetings that will make the officials realize the American people expect them to act conservatively in the matter of spending money, to curb the expenditures of the great array of bureaus and if possible eliminate many of the bureaus that are partly responsible for the fantastic taxation and inflation that have been thrown upon the shoulders of the taxpayer.

In God's name, when will the American people wake up to the fact that their future and their posterity have been sold down the river? How can they continue to tolerate such violation of trust and such incompetence in high places? The answers can be found only in the actions of those who realize the danger and take steps accordingly. Within the next few short years, their attitude shall determine whether we have prosperity and freedom or doom and slavery.

A new year's greeting to your senators and congressmen demanding retrenchment for all functions except emergencies will be helpful at least to the men in congress who are attempting to avoid greater deficits and more widespread inflation.
