It is subtitled "Exploring Ancient North America" and has been called a kind of detective story of Archaeology.

Those musically inclined will appreciate John Mueller's The American Symphony Orchestra which traces the growth, crises, repertoire, and social setting of this type of orchestra.

Parke Cummings brings to confused or exasperated parents a bit of child guidance in the lighter vein: I'm Telling You Kids for the Last Time.

Know your
OREGON MILK
CONTROL LAW

"You say I don't have the right to start a milk business..."

why not?"

BECAUSE you first must get permission. Everyone who distributes milk—whether as producer or wholesaler—must be approved by Milk Control.

Official regulations make it clear that no one will be permitted to enter the milk business if the Milk Administration says such new competition might disturb existing distributors.

Milk Control decides which distributors, as well as which producers, shall be allowed to fill our needs. No one can go into the milk business simply because he sees an opportunity. He must get permission. Once in business he cannot extend his business beyond a certain definite territory without further permission.

At the beginning of 1940 there were 766 distributors in Oregon. By 1950 their number had shrunk to 231—a loss of 70%. Yet this was the same period during which our population increased 40%.

Such rigid regulations prevent healthy competition which, in turn, could reduce milk prices just as it enables people to buy more of other foods.

The questions and answers below show some other ways in which Oregon Milk Control affects YOU.

- Q. Does Milk Control allow you a lower price when you carry milk home yourself?
A. No. You pay the higher costs of door-to-door delivery whether you use this service or not.
- Q. Does Milk Control limit the richness of milk?
A. Yes. The richness (butterfat content) of milk sold in each price range is limited by the rulings of the Milk Administrator.
- Q. Does Milk Control set the price you must pay?
A. Yes. That is the purpose for which the law was designed. It sets floor prices, not ceiling prices.
- Q. Does the Oregon Milk Control Law regulate sanitary conditions?
A. No. It has absolutely nothing to do with the sanitation, health inspection, cleanliness, or the purity of milk.
- Q. Does Milk Control limit the supply of Grade A milk?
A. Yes. To sell Grade A milk for your use a farmer must first get permission from the Administrator. If he gets permission (and many do not), he is given a quota. If he produces more he must often sell the surplus at a lower price for cheese or other factory uses.
