## Conservation Maps '53 Program In Recent Meeting

One of the first steps toward putting the 1953 agricultural conservation program into action was taken last Monday, when the Malheur County Agricultural Resource Conservation Program group met in the city hall building, Ontario.

This group, composed of representatives of all U.S.D.A. agencies in the county and the PMA county and community committeemen, considered the 1953 program for which assistance will be provided to farmers in carrying out conservation work.

The group placed emphasis on those practices which are most needed on farms in Malheur county, and which would not be carried out in sufficient volume to accomplish the

overall conservation objectives of the county without ACP assistance. The practices so selected will be incorporated into a handbook and mailed to all the farmers. This handbook will be ready for distribution at the time newly elected community committeemen for 1953 take office on Oct. 1.

- (1) to add organic strength to the soil, and
