A Successful Promotion

Nyssa merchants and other business firms did themselves proud last week when they joined together for the Dollar Day promotion that appealed to the buying public. People came to town to investigate the hundreds of special offers being made by individual merchants and found the advance advertising was correct; merchandise was being offered at great savings and the supply and selections were large enough to accommodate all comers.

No Chicken Eggs, These

SPARKLING and translucent, red, yellow, orange, lime-colored—that's the way to have your eggs this Easter. Even the Bunny is surprised at these novel eggs, for they're a bit of mimicry done with fruit-flavored gelatin.

Like the real McCoy, these eggs are good for youngsters and the unique way they're "hatched" will fascinate them. For added appeal, serve them in nests of snowy white or green-tinted coconut.

JELLIED EASTER EGGS (Dessert or Salad)
Dissolve 1 package fruit-flavored gelatin (any flavor) in 1 cup hot water. Add 1/2 cup cold water. Pour into 8 egg shells, using funnel or small pitcher. Set eggs on end in egg container. Chill over night.

Dip "eggs" quickly in warm water, crack shells and peel off. Serve jellied eggs in nests made of shredded lettuce or coconut. Garnish with candy eggs, cut fruit, mayonnaise, or sweetened whipped cream. Makes 8 Easter eggs.

*To remove yolks and whites, crack small end of each egg slightly. Pick away enough of shell so that the yolk and white will drop out. Rinse inside of shell with cold water.

Note: Use egg yolks and whites to prepare scrambled eggs for "Easter breakfast." (ANS)

and an increase in the western states of 9 percent.

Some of the early spring areas have increased 18 per cent more, Bond said, bringing the total of expected production of potatoes up to the levels of 1946 and 1960. In those years large amounts of potatoes were bought by the government under price supports, and prices for supplies moving in the trade were near cost of production levels. Past experience has shown that normal national consumption will use up around 350 million bushels of potatoes annually. If growers carry through with the acreage shown by their planting intentions, production at average yields would total between 370 and 385 million bushels.

Acreage of corn this year, according to the planting intentions report, will result in about 15 percent less production than last year, with barley about 10 per cent less.

The famous cherry trees in Washington, D. C., blossom in April and May.

Henry VIII had six wives.

National Potato Acreage Increased

The last report of national potato acreage to be available ahead of local planting time is in accordance with Turner Bond, county extension agent. The U. S. Department of Agriculture report of intentions to plant, released March 19, shows an increase in intended potato acreage of 6 1/2 percent nationally over 1952,

From where I sit... by Joe Marsh

"Biff" Falls for His Own Story

Biff Morgan's four-year-old daughter Rusty is something of a night owl. Stays awake way past her bedtime.

Every night Mrs. Morgan complained about how hard it was to get Rusty to go to sleep. Finally Biff decided to handle the situation. "Anyone can get a kid to sleep — takes a little patience! Here, hand me her storybook."

He grabs the book and goes into Rusty's room. About an hour later Rusty comes padding out in pajamas and hands her mother the book. "Read it quietly," she

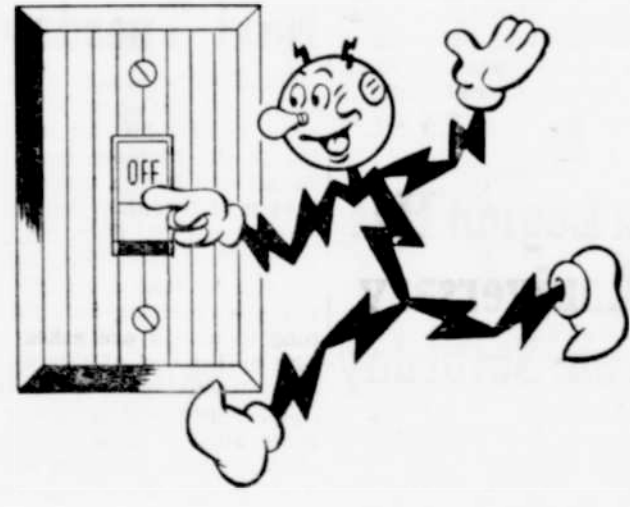

whispers, "so we don't wake Daddy."

From where I sit, Biff won't be so quick to be a "child-care specialist" the next time. If we could just resist being such "know it alls," our neighbors would be better off. Take those who would deny me a glass of beer with my supper — well, I might not care for the buttermilk they like. We all ought to realize that we all have different abilities and different preferences, too.

Joe Marsh

FIRST thing in the morning

... LAST thing at night

Chances are, the first thing you do in the morning and the last thing at night is to switch the lights on and off. Between times your day is filled with using the multitude of electric services to perform your work with a minimum of your own energy. At night, electricity goes on working—keeping your house heated, preserving your food and heating water.

The tasks performed by electricity in this modern day are numbered by the dozen. You are using more electricity than ever before because it is the most valuable hired hand you can hire, yet the cheapest.

In fact, electricity is the biggest bargain in the family budget—high in value, low in cost. Where else can you get so much for the pennies per day you spend for electricity?

Idaho Power's average rates for household electric service are 35 per cent below the national average.
