Would You . . .
TRADE 5c FOR 15c?

Hope and Charley Grider Are Doing That By
Feeding PURINA DAIRY RATIONS
to Their Jersey Cows.

They Traded 1-lb. of Purina Dairy Ration (Cost, 5c)
For 3-lbs. of Milk (Value, 15c)

During the past 4 years they have traded 13,397 lbs. of PURINA DAIRY RATION, at a cost of \$669.85, for 40,190 lbs. of milk, for which they received \$2,312.20.

For Milking Cows

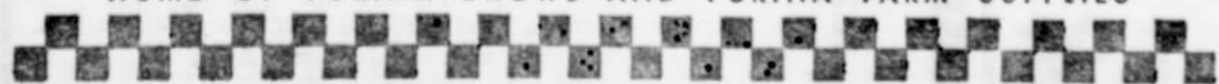

To be successful, a complete dairy cycle program must be more than a Feeding Program. Well bred animals are more efficient producers than scrubs; therefore, good breeding pays. However, well-bred animals carelessly handled mean lowered production, so a sound management program is essential. Healthy animals are always more profitable than diseased ones, which proves the need for a careful sanitation program to aid in keeping the dairy herd healthy.

The successful dairyman, then, combines good Breeding, Sound Management, Careful Sanitation, with Good Feeding to carry out a complete program through all parts of the dairy cycle; dry cows, calves, heifers and milking cows.
