From where I sit... by Joe Marsh

Heard About the Electric Weather Predictor?

Squint Smith built up quite a reputation last month by predicting the weather. What he said usually came true.

It got so that folks would sit around his little Antique Shop just to get his opinion.

Last Monday, though, he said he didn't know what the weather was going to be like next day. That surprised us and when we asked what happened, Squint said, "Slipped up on my electric bill and was turned off. I'll get to my radio again tomorrow though." Squint had been getting

the weather over the radio—just like anyone else!

From where I sit, that's the way it goes with some "experts." They often don't have any more inside information than you can get for yourself. Like those who "know" cider is the only thirst-quencher after a day's work. Far as I'm concerned, I'll take a temperate glass of beer. But—I won't try to "predict" your choice for you.

Joe Marsh

Good vision is vital to safety

You never get a "second guess" when you're driving. You must SEE it right in the first place. First rule for SAFE driving is: have your eyes examined.

Special Prices are available on metal siding and roofing from time to time. Ask us to let you know when the next carload shipment arrives.

Air Conditioning on wheels* comes of age!

Now you can have a car that's as comfortable on hot days as your air-conditioned home, office or favorite theater.

Now you can ride in draft-free coolness at the temperature level you choose—even when the outside reading is 110° and more.

Now you can take a full complement of passengers through the thick of traffic on a sweltering day—and each one of you will keep looking and feeling fresh as a daisy at dewtime.

Air intakes on each side of car introduce outside air into system.

You do this with the compact Buick AIRCONDITIONER — the completely practical unit available at extra cost in 1953 SUPER and ROADMASTER Sedan and Riviera models.

But note this: what Buick put into its AIRCONDITIONER goes beyond the usual.

For the advanced design of this Buick unit provides dual roof ducts that distribute up to 300 cubic feet of cooled, freshened, filtered, air per minute to all parts of the car interior evenly and constantly—without icy blasts and drafts on your neck, shoulders, legs.

Grilles in Buick's exclusive dual roof ducts insure draft-free distribution of conditioned air—and also provide individual control of air direction as desired.

Return air grilles on package shelf help maintain continuous circulation of conditioned, pollen-free air.

What's more, these exclusive roof ducts have individually controlled air directors above the side windows. So each window-seat passenger can guide a gentle breeze of conditioned air exactly where he wants it.

Of course, the Buick AIRCONDITIONER is automatic.

You switch it on, choose the temperature setting you want—and that level of coolness is maintained constantly. It thoroughly conditions the air around you—automatically. It carries off heat, stale air, tobacco smoke—automatically. It continuously introduces outside air into the system—automatically.

It's fast-acting, too. Even after an hour or more locked up under summer's hottest

sun, the car interior can be brought to a delightfully cool comfort in a matter of minutes.

And it's really compact. The cooling unit itself fits neatly on a narrow shelf in the big trunk compartment—leaves plenty of room for luggage and the like.

Why not drop in on us and try a demonstration?

You'll find that the Buick AIRCONDITIONER with its exclusive dual roof ducts is the ultimate comfort in hot-climate driving.

*Buick Airconditioner available in 1953 Roadmaster and Super Riviera and Sedan models at extra cost.
