LET US SHOW YOU
Why farmers switch
to the GEHL FORAGE HARVESTER

Everybody who sees the Gehl operate acclaims its superior performance and greater value. Like those famous Gehl feed cutters and silo fillers used since the first silos came, Gehl Forage Harvester has a cutting mechanism that REALLY CUTS... clean, uniform and fast.

Works swell on windrowed hay or combined straw. Makes haying an amazingly-fast job... saving time, men and money. One man operates it. Puts hay where you want it, and in half the space.

With row-crop attachment... makes the same savings in filling silos... makes silage that packs well and keeps well. Separate blower elevates forage to silo or any part of mow. Equipped with own engine, or with power take-off.

Come in now, and let us show you why "Everybody wants a Gehl."
