Weed Control

Individual farmers as well as municipal corporations, such as ditch companies and road districts, are finding the economical way to control weeds is by using the Ideal Gas & Appliance gas weed burners.

The company already has used this new, low-cost method on thousands of acres of land to practically eliminate weeds of all kinds. Four fields of onions have been thinned by scorching with the gas burner and a small amount of the cost of hand thinning while a 100-acre hay field was effectively treated between the first and second cutting.

In Nyssa, the city parkways and dozens of private homes have greatly improved appearance, all as the result of this revolutionary way of combatting weeds with little trouble, no danger and low cost. —Adv.
