There's not enough food for you and the bugs

As any backyard gardener knows, you have a fight on your hands from the moment you turn over your first spadeful of earth. At every step, fungus growths, weeds and insects wait to destroy your lawn, trees, plants, flowers. A disheartening struggle for Greenthumbers... a round-the-clock fight for commercial farmers.
But, there's a growing list of weapons you can wield against bugs. Some of the most effective have been developed by Standard's subsidiary, California Spray-Chemical Corporation. In 1907, we brought out the first basic lead arsenate to stop the codling moth, a fruit crop destroyer; later, new-type summer and dormant oil sprays that safely checked scale and other insects.
