You'll feel like a pilot**without leaving the ground****Just wait till you switch the pitch
of Buick's new Dynaflo*!**

HOW would you like to take the wheel of a high-powered Buick and feel an experience you never felt before in any earth-bound vehicle?

How would you like to do—just by pressing down the gas pedal—what a pilot does when he's ready for take-off?

And how would you like to drive with the happy thought that you're getting plenty of miles per gallon in normal cruising—and the electrifying action of the world's first airplane-principled transmission when you need it for split-second getaway response?

It's all for you when you say the word and slip into the driver's seat of a new Buick with Variable Pitch Dynaflo.*

Not only do you take command of record-high Buick V8 power—and the most envied ride in the industry—and the brawn and heft and luxury of a truly solid automobile.

You also call the turn on twenty propeller-like blades deep inside a wondrous new Dynaflo that's patterned after the principle of the modern plane's variable pitch propeller.

You hold these blades in their high-economy angle when you press the pedal in the normal way—and you get a lot more miles from a tankful of gas.

You switch the pitch of these blades to take-off position when you press the pedal way down—and you get spectacular action instantly.

Don't take our word alone that this is thrilling beyond all previous experience.

Talk to anyone who's tried it. Or, better yet, come try it yourself. That way you can learn firsthand why Buick sales are soaring to all-time best-seller highs. Drop in this week, won't you?

*Dynaflo Drive is standard on Roadmaster, optional at extra cost on other Series.

Thrill of the year is Buick
