

ANNOUNCING:

The Greatest Boon To Farmers In Valley History . . .

Tobler's takes great pride and pleasure in announcing completion of its great new 300,000-bushel granary, and the near completion of the most modern grain processing mill in this area.

These two major installations, home owned as they are, may greatly effect an improved economy for the Valley's grain growers, since they will give the farmer a specialized, personal service he has never before enjoyed.

Within a few short miles of his ranch, the farmer, by ACTING PROMPTLY, can now avail himself of these benefits:

1. He can drive his trucks up to our modern dumping pits and sell his grain on the spot.
2. He can leave his Government Allotment wheat in storage and immediately secure a cash advance of \$2.95 per hundred.
3. He can eliminate costly rehandling, sending grain direct from his fields to our Ware-

house, with no unloading delay, no putting in at harvest and taking out at end of storage.

4. He has full control of his grain to take out at all times, to sell at market peaks, haul out at his discretion, manufacture into feed, or convert into cash.

5. With completion of our new mill he will have on-the-spot treatment of his grain-rolling, grinding and molasses treating, to his own specifications, - on a single trip to the mill.

Tobler's believes that this new granary and rolling mill will save much time, save many transportation miles, and consequently save much money for Valley farmers.

But it is important that Immediate Action be taken to reserve our full facilities for your personal use. Write, telephone or visit us at once, to assure yourself of full participation in our profit-earning plan to increase your farm dividends.
