Dangers of Full Employment

Efforts will be made to eliminate all unemployment, says Labor Secretary Mitchell.

Doesn't the man realize that such action would cause unemployment in Oregon far beyond Sen. Wayne Morris' wildest dreams? In the Oregon unemployment offices clerks, typists and statisticians, whose numbers must run into the thousands if paper work and mystic reports are any indication, would be left with no jobs if there were no unemployment figures to compile.

Of course, these unemployment administration employees could be kept busy for several months storing away all the red tape their office has created.
