COLOR CLINIC

By CAROLEE

Color is a useful agent in personalizing a room through expression of individual tastes. Almost everyone has certain favorite colors—but it is well to remember that in general men prefer a background of darker and stronger color tones than those which appeal to women, and young people usually like brighter, gayer colors than their parents. Analyze your own color likes and dislikes. You may discover you have been using the colors you like in the wrong combinations and getting unsatisfactory results. Or you may find there are delightful color harmonies you have never thought about which are much more satisfying.
