This GMC has "muscles" unsurpassed in its class!

The facts speak for themselves.

This new GMC 250-8 has 180 V8 horsepower standard. No other truck in its class comes even close.

The extra power delivers 276 foot-pounds of truck-propelling torque. Over-the-road truckers call it "guts" — and this GMC's got up to 33% more than the others.

It's at the top of the heap in frame-strength, too. There's as much as 10% more "muscle" in its chassis than in comparable trucks.

And there's more. For this rugged

GMC has 3500 lb. front axles and 7200 lb. rear — unsurpassed in its weight-bracket. It has extra-size brakes and springs.

Add it all up and you can see what GMC Blue Chip stamina really means. Especially when you team it with a GMC's dependable performance and Hydra-Matic* savings.

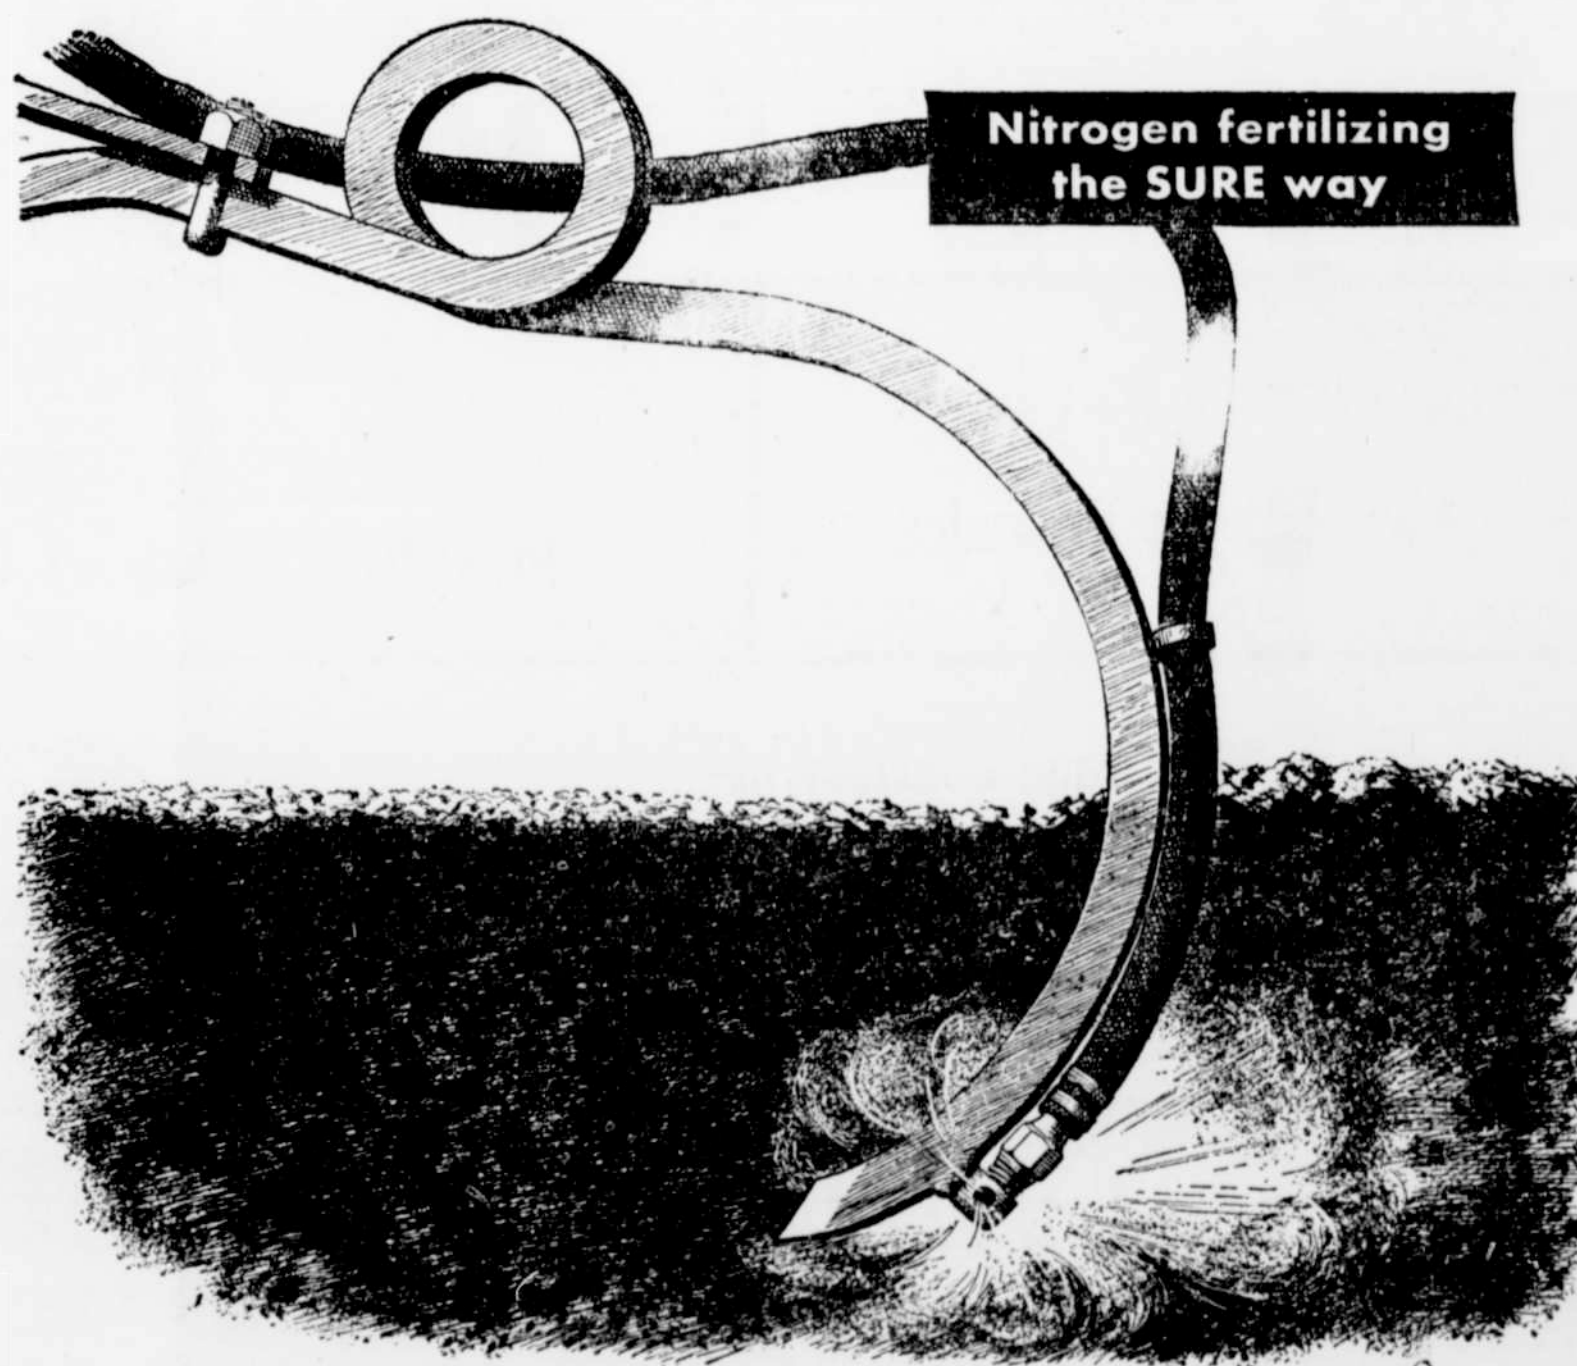

For here's a truck that not only delivers the goods at lowest cost — but keeps delivering long after an ordinary truck would have faded out. Come in and talk it over!

*Optional at extra cost
