Newest Buick Yet

YOU know all that talk you've been hearing about the 1957 new car models being really new?

Well, in the case of the 1957 Buicks it's true—gospel true.

We mean these 1957 Buicks are new in the precise and literal sense. We mean new from the ground up, and from gleaming grille to sassy taillights.

We mean new lowness, new styling, new bodies, new windshields, new controls, new safety-padded instrument panels, new safety steering wheels, new seating, new fabrics, new colors.

We mean new front end, new rear end, new frame, new braking, new steering, new handling, new riding, new roadability—a whole new chassis of greater solidity and safety.

We mean V8 engines new from the crankshaft up—engines that deliver an all-time high in horsepower and

compression from their 364-cubic-inch displacement.

And we mean, most of all, an advanced new Variable Pitch Dynaflo®—so instant in the starting range—so utterly smooth and so totally full-range in "Drive"—that your need for "Low" is practically eliminated.

So come take in these low-silhouette, these boldly beautiful, these instantly obedient Buicks for 1957.

Then you'll see why you can't blame us for being so fired up about it all—and how catching this excitement can be.

*New Advanced Variable Pitch Dynaflo is the only Dynaflo Buick builds today. It is standard on Roadmaster, Super and Century—optional at modest extra cost on the Special.
