THOUSANDS of farmers
are switching to the
HARROWEEDEER*

*The

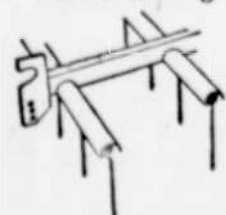

Farmhand-Melroe

"Vibracoil" Harrowweeder

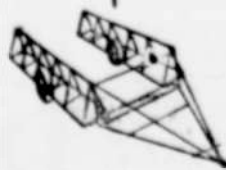

With the multi-purpose harrowweeder, you prepare a far better seed bed for better seed germination, then, do a much faster, cleaner job of weeding row crops with the same machine.

HERE'S THE REASON! Constant "vibracoil" action of the small-diameter teeth turns up the soil from underneath, uproots weeds, works out moisture-robbing air pockets. Teeth penetrate deeper, do not pulverize soil.

FAST, CLEAN ROW-CROP CULTIVATION—6 to 20 acres per hour, depending on tractor speed. Harrow sections reverse to give back slant for self-cleaning in trashy or rocky fields.

ONLY the Farmhand-Melroe Harrowweeder has the patented 6-wrap "vibracoil" steel teeth, specially heat-treated to avoid bending or breaking. This is what does the job . . . so don't be fooled by imitations.

In transport position sections ride on quick-folding drawbar, which passes through any gate, trails easily. A size for every farm, from 15 to 55 ft.
