Idaho Farmer Boosts Potato Yields with 'N'

"N"
It takes N, men

Arliss Lee, successful farmer of Murtaugh, Ida., is one of many Idaho farmers who have found proper fertilization the key to added income.

"Without fertilizer, we could get only 200 sacks an acre from our potatoes. With fertilizer, we get 350 sacks — that's why we see that fertilizer is applied and that we use enough," Mr. Lee says.

"For nitrogen requirements, I like USS Nitrogen Fertilizers. That granular USS Ammonium Sulfate is easy to apply—no clogging the machinery," Mr. Lee says.

In addition to 130 acres of potatoes, Mr. Lee has 148 acres in wheat, which he sends to the mill. "We use 50 pounds of available N per acre, and our yields are 80 bushels an acre, and up. That's a real increase—we used to get about 50 bushels an acre without nitrogen," Mr. Lee reports.

Order USS Nitrogen Fertilizers from your dealer today for that added income at harvest time. USS Nitrogen Fertilizers, made by United States Steel, are easy to use and they help farmers achieve higher yields and higher profits.
