Side-Dress With USS Nitrogen Fertilizer for Added Profits

Len Brady, Paul, Idaho

Potato demonstration trials conducted on the Len Brady farm near Paul, Ida., during 1958, brought these important findings:

1. Increases up to 184 sacks per acre with proper fertilization.
2. Added profit of \$128 per acre.
3. High quality potatoes with proper fertilization.
4. It is necessary to use both nitrogen and phosphorus in adequate amounts.

Without fertilizer, this demonstration plot yielded 159 sacks an acre. With both nitrogen and phosphorus applied in adequate amounts, Mr. Brady's yields jumped to 343 sacks an acre.

That's an important increase in yield and profit — one that you can achieve on your farm. Use enough fertilizer, use proper amounts — 120 pounds of available N, or more, and adequate phosphorus — and see the results in added income. Be sure you use enough fertilizer this year. Side-dress now for top yields.

High quality, easy-to-use USS Nitrogen Fertilizers are made by United States Steel for western farmers. Insist on USS Nitrogen Fertilizer. Order from your local dealer today.
