Home Fire Every Two Minutes
In 1958 there were 299,861 residential fires in the U.S.—which means that every two minutes a home in some American community suffers fire damage.

A car with major advances in transmission, suspension, brakes, and engines which are Buick's alone today
A solid, substantial car • A car of superb comfort, quiet, reliability • A car you should drive soon

New comfort, quietness, and quality
Doors that open wider — easier to get in and out. Family-size interior. Seats that are higher, more deeply cushioned, and repositioned to provide more room for feet and legs. Perhaps the quietest running car in America due to Buick's high use of insulation and torque-tube drive. Buick's quality control program comes to a peak in the Turbine Drive Buick '60.

New interior decor and convenience
An entirely new "Mirromagic" instrument panel. It lets the driver see speed, gas gauge, and other necessary readings at a glance in a mirror he tilts to suit his own eye level. And a new exclusive safety option—the Twilight Sentinel*—that turns headlights on automatically at sunset... off automatically at sunrise. All-new colors and fabrics. *At slight extra cost.

Outstanding performance with economy
1. Buick's Exclusive Turbine Drive Transmission† is jet-smooth, responds faster, more economically than ever. No gears ever shift while the car is in motion.
2. Buick's Exclusive Air-Flo Aluminum Drum Brakes—found on no other American car. Fin-cooled drums front and rear for faster cooling. Fast cooling means safer stops, longer brake life. Slotted wheels pass a current of air from under the car constantly over the brakes for added cooling efficiency. (Wheels are 15" size which gives you up to 1/3 more tire life.)
3. Buick's exclusive Wildcat Engines give high efficiency with high economy. (An optional new LeSabre Engine is designed to give Buick performance on regular grade fuel.)
†Optional at extra cost on LeSabre, standard on Invicta and Electra.
