Hope all of you have rested sufficiently since the Demo convention to be ready for the Republican show starting this coming week. They will have a big advantage of being the last "Tale Teller" of what they intend to do for us.

If the Demos can carry out their program, there is a very good chance that you can get a job with the government. It will take a lot of people to carry out the platform, establish and man those new agencies proposed.

According to Tax Foundation, there are now 8.5 million people on the public payrolls and nearly a quarter million of these have been added in the period from October 1958 to October 1959—during the term of a conservative Republican. So if the liberals can get in they will build a trough big enough for all of us to feed at it.

No less interesting than the proposed program is the manner of financing it. A plan is under way so that it will now be possible to "Have your cake and eat it at the same time."

These savings are somewhat like the home freezer salesman telling the housewife how she could pay for the appliance. The savings on food would make the payments. The woman replied, "Yes, I know, we're paying for our car on the carfare we save, and for our washing machine on the laundry bills we save, and for the house on the rent we save."

But we can't afford to save any more right now."

Our neighbors abroad know what we pay in taxes; they are spending it. Wonder if they also know the interest on the national debt costs \$1,084,400 every hour throughout the year!

"The only thing higher than our standard of living is the cost of it."—Maurice Seitter.

It's doubtful that the people will be too worried over the age of Jack Kennedy . . . Theodore Roosevelt was inaugurated at the age of 42 and he didn't do so badly . . . "talking softly and carrying the big stick."

Wonder if anyone else got a letter from the congressman with a 4 cent stamp attached. The "Free" was marked out so we read it carefully thinking it was a personal letter. But we could find little difference in it and the others coming so frequently. Must have been one of those small oddities that come in election years.

Made a trip to Jordan Valley and Silver City recently. Were pleasantly surprised to find Jordan Valley so clean and modern . . . Had somehow pictured it as a wide place in the road with a store and service station and some ranch houses. You can reach Silver City from the Oregon side (by car, too) but once would probably be enough for you also. The road out to Murphy is very good for a mountain road, but the cooling system on your car should be in good shape.

Speaking of cars . . . Why do the small cars park in the extreme front of the designated parking space and leave so much space in the rear? If you happen to push one back the owner will likely tell you his bumper isn't very stout.

The Old Timer says: "Short skirts make girls look taller . . . and men look longer."

We sure have trouble keeping friends . . . Colby is still insulted because we used the term "would be golfers" in referring to some who made the trip to Baker . . . He knows our newspaper code calls for the truth in all reporting! Lynn Butcher has to wait until we're playing with him to make a "hole in one" . . . Naturally we lost him . . . He's floating in the clouds.

But our old buddy is down on us, too. We usually play for the drinks and we learned you could get a 25 cent size glass of iced tea . . . Yeah, he squawked. But he's the same guy who wired the chickens' water pan with electricity and, after playing havoc with them, talked his younger brother into pouring water into the pan while it was still wired.

Safe Bike Riding Habits Stressed; Cautions Listed
 Parents who teach their youngsters safe bicycle riding habits can help save lives this summer, and as an extra bonus, contribute to safe automobile drivers in the years ahead.

Mrs. Roberta Frasier, Oregon State college extension family life specialist, reports that an estimated 500 children are killed in bike accidents each year with summer listed as the most dangerous season. Four out of five victims are under 16 years of age and violating rules of the road.

Turning, riding the center of the road and refusal to yield the right of way are among leading violations. Often, she notes, parents buy a youngster a bike, put him on it, and shout a few instructions as the child rides out of earshot. More training than this is needed, she continues.

Bicycles and automobiles are governed by the same rules of the highways and require some of the same learned skills. Children can also learn to appreciate that driving on the streets and highways is a privilege and not a right. Mrs. Frasier suggests that bicycle privileges be revoked when riders violate rules. Here are other suggestions she offers:
