Would you sign  
this \$10,000,000,000 I.O.U.  
for unnecessary taxes?

Of course you wouldn't take on such a staggering debt yourself. But you and other taxpayers may share this whopping burden in new taxes!

What would it be for? To put the federal government farther into the electric light and power business. And it will be a reality if the promoters of such federal "public power" get their way. Already, such spending for this purpose has cost taxpayers about \$5,500,000,000! (That's five and a half billion dollars.)

Is \$10,000,000,000 more tax spending really necessary? Not at all. Independent electric companies like yours are able and ready to fill America's growing needs for low-price electricity. And they don't depend on your taxes to do the job.

Unnecessary tax spending for federal "public power" goes on mainly because so few people know they are paying the bill. But it can be stopped as soon as enough people do know. Will you help spread the word?
