AT LAST! Science Now Gives You Clear Hearing Again . . . With Nothing in Either Ear!

The NEW electronic "break-through" has aroused enthusiasm among business men who don't want to wear a hearing aid, but want to hear clearly in conferences, meetings, at the theater, etc.

It's no longer necessary to advertise your deafness by cupping a hand behind your ear, asking people to repeat, or wearing an old-fashioned "hearing aid." It's no longer necessary to miss the theater because you can't sit in the first few rows.

The exclusive, patented new Latenser will let you hear clearly without having a seat in the front row. It's always ready. Put it on or take it off as easily as a pair of glasses. No wires, cords, tube or ear plugs—works on contact with the head. Your appearance is completely natural.

The principle is simple, but never before has it been applied with such amazing effectiveness. A remarkable NEW "Tympane Technique" bypasses the defective outer and middle ear, conducting sounds directly through the mastoid process to the healthy, active inner hearing mechanism.

Find out—without any cost or obligation—how this scientific electronic development will help you hear again clearly and distinctly. NOTHING IN EITHER EAR . . . Find out how it can help you enjoy normal business, social and religious life.
