Towering Space Needle symbolizes future.

Natural Gas Pavilion contains exhibits by gas industry.

Visitors are whisked from downtown Seattle by monorail.

Graceful arches mark U.S. Science Exhibit.

It's Fair In Seattle

The 600-foot Space Needle topped by a 40-foot natural gas flame. The Coliseum with its preview of the next century. The United States Science Exhibit featuring a simulated trip through space. A monorail to speed visitors to and from the Fairgrounds. Displays from all around the world.

These are a few of the exciting features of the World's Fair in Seattle to last through October 21. When you are at the Fair, take a few days to see the majestic mountains, beautiful lakes, magnificent

rivers, and unexcelled coastline as well as the vast interior of the Pacific Northwest—Washington, Oregon, and Idaho.

El Paso Natural Gas Company is proud to serve this prosperous, growing area and is proud of the key role that gas is playing in supplying energy to the industries and homes of the Pacific Northwest. Natural gas' prominent place in the Pacific Northwest is dramatized by its part in the Fair: here gas is used to heat and cool the buildings, to cook the more than 20 million meals that will be served, and serves as a symbol of progress in the huge flare atop the Space Needle.
