FALL Fertilization

...A GOOD PRACTICE

It's a sound farming practice to apply Simplot Fertilizers in the Fall. You enhance your chances of growing a profitable crop in several ways.

Simplot Ammonium Phosphates supply Nitrogen to aid in decomposition of organic residues, improving your soil. The phosphate gets well established in the root zone for next year's growing. Many farmers also broadcast Simplot Triple Superphosphate for Fall plow down.

Not only does Fall fertilization save valuable time in the Spring, but your crops get off to a faster start, yield more.

Your near-by Simplot dealer can help you with your choice of analysis and application rate.

SOIL FERTILITY MAKES SENSE AND DOLLARS, TOO WITH SIMPLOT FERTILIZERS
