Everybody saw these headlines this year:

FLORIDA'S WINTER ONE OF COLDEST IN RECENT YEARS  
SANFORD, Fla. — Low-temperature records standing since 1898 were broken this year. On December 13, it dropped to zero at Tallahassee.

MIDCONTINENT SHIVERS IN SUB-ZERO WEATHER  
Chicago — Only one winter since 1900 has been colder in Chicago and Illinois than this past winter. The mercury averaged nine degrees below normal.

Sub-Zero Cold Grips Region  
KANSAS CITY — Subzero cold gripped most of this area in January and February. Business activity was curtailed, and low temperatures reaching as far as 15 degrees below zero, broke all existing records in two states of Kansas.

Alabama's Weather Is Cold and Costly; Near-Zero Readings  
Montgomery, Ala. — The winter was cold, and costly, this year in Alabama, with several cities reporting the coldest winter since the beginning of recorded weather.

BUT YOU MAY HAVE MISSED THIS STORY:

Pacific Northwest Has Warmest February In Past Sixty Years  
SEATTLE, Wash. — February's weather in Washington and Oregon was the warmest in 60 years. A check of records from the Weather Bureau...

HIGH TEMPERATURES, LITTLE WINTER SNOW IN PACIFIC NORTHWEST  
Portland, Ore. — The Pacific Northwest had another moderate winter — one of the mildest in years. Temperatures were in the upper ranges, and there was no more snow on the ground in Oregon and Washington.

## The Pacific Northwest had another pleasant winter

Almost every edition of newspapers this past winter brought reports of record cold. In Louisville, Kentucky, one day this past January, frigid winter blasts dropped temperatures to 20 degrees below zero. In Chicago that same month, temperatures plummeted to 18 below zero; in St. Louis, to 11 below zero.

The news was similar almost all over the country. But not in the Pacific Northwest. There, the news was good—another mild winter; in fact, one of the warmest ever.

In Portland, Oregon, and Seattle, Washington—leading cities of the Pacific Northwest—winter temperatures over a 30-year period have ranged in the moderate mid-30's to mid-40's. In summer, the temperature range averages a cool 56 to 79 degrees.

Year-round, temperatures are mild: warmer than average in winter, cooler in summer. And there's little ice or snow to shovel.

It's the kind of country in which people like to live, and to work. The climate is one of many reasons the Pacific Northwest is one of America's last great frontiers—a modern frontier of economic and population growth.

The Pacific Northwest states of Washington, Oregon and Idaho are among the 11 states of the West served by El Paso Natural Gas Company, whose pipelines are connected with the great gas-producing areas of the Southwest, the Rocky Mountain states, and Canada.

In 1962, the Pacific Northwest states used more natural gas than ever before... and this new frontier is just beginning to grow.
