TWO RAINBOW TROUT held by Carroll Hill, Idaho Power company superintendent of fish facilities at Brownlee and Oxbow dams, show how three to four-inch fish were marked before being planted recently in Oxbow's man-made lake. Circled on trout at left is area where fins were clipped from approximately half of the 50,000 fish of this size in the planting. In circle

on trout at right are fins as they appear on remaining 50 percent of the fish in the release. Fishermen have been asked to report catches of the marked rainbows, when they reach legal size, to the Idaho Fish and Game department and the Oregon Game commission to assist the agencies in determining the survival rate of the trout in Oxbow's lake.

CHECKERBOARD service bulletin

It pays to feed heifers, dry cows the Purina Way!

Grain feeding of heifers and dry cows is an accepted practice by leading dairymen here in the East. They do it to make more milk... and more money. Many report 1,000 pounds more milk during the next lactation when a dry cow is properly conditioned on Purina D & F Chow. You feed it according to body weight... a thousand-pound cow, for example, needs only 10 pounds a day. Purina D & F—full name, Dry and Freshening Chow—is specially designed to help build body condition, which later converts to low-cost milk. You'll find D & F in coarse or pellet form, whichever fits your feeding situation best.

Either way, it's one of the smartest feed buys on the market today. Ask for it by name—"Purina D & F"—at our Store with the Checkerboard Sign.

ELECTRIC HEAT

Already home owners in the area served by Idaho Power have learned that it is completely practical as well as wonderful to change over to trouble-free electric heat!

You can do it by conforming to the regular Gold Medallion standards for insulation and double doors and windows. For assistance in your planning, you are invited to visit your local Idaho Power Company office or call your electric heating contractor.
