

Phoenix Downs Vale Gridders 26-0 In A-2 Semi-Finals; All States Named

By FRANK PARR

Phoenix, a small town about five miles south of Medford, sent its football team to Malheur county last Saturday to meet the Vale Vikings in the A-2 semi-final playoffs.

Bulldogs To Meet John Day Dec. 7

(From the Nyssa High Bulldog) John Day will be the scene of the first basketball scramble for the Bulldogs as once again that time of the year rolls around.

This year a change in the team has been made. Coach "Chick" Quinowski is carrying only 13 instead of the usual 15 varsity members.

According to Quinowski, the team has made excellent progress since the start of the practice season.

Six returning lettermen are proving to be a strong nucleus for the ball club, the coach commented.

Average height of the Bulldog club will be six feet. This is a bit less than the John Day Prospectors.

Seven hoopsters up from last year's junior varsity are adding force to the team.

Dec. 3, 8 p.m.—FFA meeting. Dec. 4, 6:30 p.m.—District 7 A-2 meeting in John Day.

Dec. 5—Evening band practice. Dec. 6, 8 p.m.—Basketball, Harlem Stars vs. Nyssa All-Stars. Dec. 7—Junior high dance.

SUGAR BOWL League Standings

Gate City Cleaners	36	12

Jerry Myrick Rolls 181 Triplicate Series

Jerry Myrick, a member of Howard's Texaco team of the Nyssa Commercial Bowling league, rolled a 181 triplicate series during league play Tuesday evening, Nov. 19, at the Sugar Bowl.

NYSSANS HOST STUDENTS

Dan Pearson, Denny Letourneau, Darrell Hoss and Warni Rowland, all students from McCall, were house guests during the recent vocal music clinic of Miss Carolyn Tensen in the home of her mother, Anne Tensen.

RETURN FROM ELK HUNT

Mr. and Mrs. LaVern Cleaver, Mr. and Mrs. Duane Holcomb returned Sunday evening from the Wallowa area where they had spent 10 days elk hunting, but report that they returned empty-handed.

OSU Zoologist Reports Bird Migration To and From Oregon During Winter

Millions of birds migrate from Oregon to warmer southlands each fall but lesser numbers (still counted in millions) come to the state from the north for the winter, an Oregon State university zoologist points out.

Western Oregon is a fairly good winter area for waterfowl and some small birds, Storm notes. Starlings overwinter here in tremendous numbers from the Plain states, for example.

Several sea gulls that nest in northlands, such as Alaska, migrate down to the Oregon coast, he reports. The common gull of eastern Oregon moves to the coast also for the winter.

Other birds that migrate here for the winter include the rough-legged hawk, shore birds, pipit and several sparrows.

OSU zoologist reports that in August and probably reach a peak in late September and October but continue well into December. Those that leave Oregon for warmer climates include the turkey vulture, night hawk, flycatchers, swallows and most warblers.

Many Stay in State A sizeable number of well-known Oregon birds don't migrate at all. These include the meadow lark, blackbirds, jay, song sparrow, most western Oregon hawks and probably robins—although robins apparently do some shifting of areas from season to season.

Quails and pheasants—poor long-distance fliers—stay the year around in Oregon, too.
