The great highway performer

*'64 Chevrolet Impala Sport Sedan and (background) Impala Convertible

'64 Jet-smooth Luxury Chevrolet

What does it take to make a car a great highway performer?

If the car happens to be a '64 Chevrolet, one thing only. A highway.

You'll find everything else already neatly packaged for you—on the car exactly as you pick it off the showroom floor.

There's a choice of seven engines—all the way up to a twin-carb high-compression 425-hp V8*—and four transmissions, including a finely honed 4-speed stick shift.*

And underlying it all—a bump-skimming Jet-smooth ride that helps keep the performance great even when the highways aren't so great.

What about special performance equipment? Professional driving skills? Forget them.

Nobody has to doctor or coax or soup up these Chevrolets to get the best out of them. And that's really the test of a great highway performer: Just about anyone can get a kick out of driving one, just about anywhere, just as it comes out of the showroom.

Next time you're out your dealer's way, allow a few extra minutes to sample one of these highway performers on your own. A few are really all you'll need. That's enough time to do a lot of driving in a Chevrolet. *Optional at extra cost

Whose Power Bills Are You Helping Pay?

Preference customers for federal electric power are actually able to tap your pocketbook for a sizeable part of their monthly power cost.

This small minority of power users—REA's and some municipalities—are the beneficiaries of subsidized, tax-free electric power at your expense.

This is a very substantial item. When you pay your electric service bill to Idaho Power, a third of it goes for taxes.

Preferred customers of federal power systems avoid most of these taxes. The result is that you—as a taxpayer—must pay more in taxes than you would were the burden shared by everyone. You make possible the subsidy enjoyed by the few.

There is nothing miraculous about Bonneville Power. It isn't particularly cheap. Idaho Power's rates are lower, when Bonneville tax avoidance and other subsidies are taken into account. It is merely a device for furnishing below-cost electricity to a favored few at the expense of taxpayers.

Do you know any good reason why you should help pay some other people's power bills? Or why they should expect you to do so?
