This is the story of FALL PAUL

Paul was a farmer who used Simplot Fertilizers on his land every Spring to increase soil fertility and income. He was successful until one year when a late, wet Spring kept him from getting his fertilizer on. His yields were off and his income sagged.

Now Paul applies Simplot Fertilizers to his land in the Fall! He knows that there are many advantages and they all help him make more money.

Paul is also very insistent that he get Simplot Fertilizers because of their high quality and the good results he has always enjoyed.
