1965 Grain Signup Deadline March 26

Friday, March 26, is the last day growers may file applications to take part in the 1965 feed grain program, J. P. Bunch, chairman of Agricultural Stabilization and Conservation county committee, said last week.

He reminded farmers that only those who participate in the feed grain program will be eligible for price support on their 1965 corn, barley and grain sorghum crops. As last year, the support is made available through loans and price support payments.

Besides qualifying for price support, the participating grower also earns a diversion payment for shifting part of his feed grain base to a conserving use. Minimum diversion is 20 percent of the individual farm's total feed grain base. Maximum diversion is 50 percent of the base or 25 acres if this is more.

For diverting more than the minimum, the diversion payment will be figured at a higher rate. If the actual diversion is 40 percent or more, the higher rate applies to the whole diversion.

The chairman reports that farmer interest in Malheur county is about the same as last year. Indications are that 1965 participants will number a few more than those under the 1964 feed grain program.
