There's a better way to heat water

In fact, there's no better way to heat water than with natural gas.

If gas is already in your home for some other use, not including water heating, you're missing one of the great joys this superior fuel can bring.

Or if you're planning to join our happy throng soon, by all means include hot water by natural gas.

Folks with gas-fired water heaters are to be envied. Their hot water never runs cold. When they open the tap marked 'H' they KNOW what they're going to get!

Natural gas provides instant, constant hot water because it is an intense fuel that responds quickly.

It's THERE when you want it if you heat water with gas. (P.S.: It costs less, too!)
