Work Smarter . . . Not Harder

By BERNICE STRAWN, Extension Home Management Specialist

BRIDES, YOU'LL BUILD YOUR REPUTATION

... as a good hostess faster if you make certain you serve good coffee. Here's an important tip.

You may have an electric coffee maker you use just for company. Each time before using, add water, a little detergent and let it perc for a couple of minutes. Then rinse thoroughly with cool water.

This extra cleaning just before using will prevent any off flavors due to coffee oils which seem to have "squatter's rights" in utensils. If the coffee maker is used every day, the coffee flavor is less likely to be affected because the oils don't have time to get rancid.

DECISIONS, DECISIONS!

Just trying to decide what to do uses up a lot of time and energy that could be spent doing the job with less wear and tear on you.

Young homemakers, don't let worry slow you down. Here's a simple five-step formula to use in making any decision.

1. Think through your resources—time, money, energy, skills. In other words, just what do you have available?

2. What is your goal? Get this clearly in mind because it's the key to your decision.

3. What different ways could you do the job? Consider the pros and cons of each.

4. Take action—choose the way you think will meet your goal. Or, if you'll pardon a rather impolite expression—don't just stand there, do something!

5. Follow through and if necessary, revise your decision. Revision doesn't mean you've made a mistake. This is a perfectly normal consequence and shows that you're doing what any good manager would do.

Every time you replace inaction with action you beat down that procrastination habit and grow in pride of accomplishment.

YOUNG HOMEMAKERS

If you yearn for savory roast beef but the price tag on standing rib doesn't fit your budget, buy a cheaper blade roast. Many people think this cut has to be pot roasted, but it can also be dry roasted to give tender juicy beef.

Mrs. Velma Seat, OSU extension food marketing specialist, told us about research which shows that choice-grade blade cuts dry roasted in a 225-degree oven were more juicy and just as tender as when pot roasted. You need to allow about two hours per pound at this temperature. This takes a little more fuel, but you'll still be money ahead buying the cheaper cuts.

It's often a time saver for you to put a roast in the oven at a low temperature and leave it several hours without other attention.

WHEN YOUR UPRIGHT VACUUM CLEANER

... doesn't pick up like it should, check the three B's—belt, brush, bag.

On this type of cleaner, the belt may be loose or cut due to picking up pins or other sharp objects. Then the brush doesn't rotate and pick up litter. Turn the cleaner over and check the belt. If the brush doesn't revolve when the cleaner is turned on, then you probably need a new belt which costs very little. Your instruction book will show you how to replace it.

If the brushes are worn, they can't touch the carpet and sweep up litter. Brushes can be adjusted lower or if necessary, replaced by new ones. Again, your instructions will help you.

Has the bag been replaced or emptied recently? When the dust clogs the bag, suction is reduced and dirt isn't picked up.

STUBBORN WATER SPOTS ON WINDOWS

... after lawn sprinkling, take a lot of persuasion to come off, especially after baking in the sun.

There's no one answer, but there are several things you can try. One of our county extension agents removed spots that had accumulated for several years on basement windows. She found powdered rust remover sprinkled on a cloth did the job, but it wasn't easy.

A lot of hard rubbing was necessary. Copper cleaner and soap-filled steel wool pads have also been successful in some areas.

In a few cases the minerals in the water have pitted the glass and there is nothing you can do short of putting in new glass.

IS BABY'S WHITE WOOL BONNET

... or blanket turning yellow? After sudsing clean, bleach white wools in three percent hydrogen peroxide and water solution. (The druggist will sell this to you.) Add 1/2 cup peroxide to two cups of water and let wool stand in solution four or five hours.

Repeat if necessary. Be sure to rinse thoroughly after bleaching. Dry wool away from heat and sun to prevent yellowing.

STEAKS ON THE HOOF

Very much a going industry around Ontario, Oregon, is the buying and selling of livestock. One of the commission companies operating livestock auctions here is ranked among the top ten in the nation. Last year the dollar volume of such sales approximated \$12,500,000, involving 106,000 head of cattle, 5,000 hogs and 17,000 sheep. Weekly sales attract buyers and sellers from all over the West, and special sales often feature animals of a particular class, and occasionally livestock from a particular area.

In many transactions in this busy market readily available bank credit is a primary consideration, and the people of First National are on hand to make this possible. The First National branch manager shown here with the commission company manager is experienced and informed when it comes to the livestock business. He is able to bring First National know-how and resources to bear on any phase of business management. He is a part of the community he serves, and like all First National people, he knows how business is done in his area. In Ontario, and in all of Oregon, First National is people, serving the banking needs of other Oregon people.

Ronald E. Young, Manager, Nyssa Branch, is one of the helpful, experienced First National people who are serving your banking needs in Nyssa and Malheur County.
