THE MOST EFFICIENT SUBMERSIBLE PUMP EVER MADE!

A remarkable new pump—the Jacuzzi submersible—is available for use with a pressure tank on deep wells of 4 inch or larger diameter. The precision-built multi-stage pump is close-coupled to an electric motor. And the entire unit is designed for complete submersion below the water level.

- It's water lubricated . . . runs cool. You don't see it or hear it.
- Gives greatly increased efficiency. You get more water for the horsepower than from comparable submersibles with overload.
- Jacuzzi is one of the oldest makers of submersibles, jet pumps and water systems in a wide price range.

Call us for an estimate. Absolutely no charge.

Look to Jacuzzi for quality in pumps, water systems, swimming pool equipment and marine jets for boats!
