Our research provides more usable energy to meet your needs

This 1,000,000-pound tower - heaviest load ever carried cross-country on rails - is one of 8 for Standard Oil's remarkable new Isomax refining unit, being built to serve the West's expanding demand for petroleum energy.

The Isomax Process, a revolutionary technique developed by Standard Oil scientists, is uniquely efficient in its ability to refine less desirable heavy oils into the highest quality motor fuels.

It is a major breakthrough in supplying the ever increasing need for more specialized high-quality fuels... so important to oil conservation that Standard Oil licenses the process to other oil companies throughout the Free World.

The Isomax Process means better gasolines for today's cars, and for cars now being designed for the future... another proud research "first" by Standard Oil - for you.

The research skills which created the Isomax Process go into the development of all our products at the Sign of the Chevron... to take better care of your car. Your boat, too!

The Chevron Sign of excellence
