Use PCA Financing to increase profits on your farm or ranch

PCA loans make it possible for good farmers and ranchers to have modern machinery and materials that increase production and lower costs.

Loans for such major improvements allow you seven years to pay. Your payments are applied to the principal, reducing the balance subject to interest, thus lowering your total loan costs.

Other PCA loans provide operating capital. You receive a commitment for the entire year, but you pay no interest until you actually use the money, then only for the time you use it.

Let us show you why PCA agricultural loans give you lowest loan costs; and get your free copy of "Budgeting for Profit". No obligation, of course.
