WHERE BEAUTY IS A TRADITION

It grows on you...
Natural gas satisfaction

After you use natural gas for one purpose—like heating, maybe—you wonder if it wouldn't be good for other uses. It would indeed! Add a gas water heater and a gas range. Then you'll have the trio that will make your house a home. The more you use natural gas, the more you like it. Because it is alive and circulating, natural gas is a healthful heating energy. Because it is instant and intense and quickly responsive to controls, natural gas is far better for heating water and for cooking. Because it is clean and dependable and economical, this modern fuel "grows on you" until you have solid natural gas satisfaction. The horrible thought now occurs that you might not have gas in your home at all. If this is true, let the Cascade Man talk to you right away. He'll explain, without obligation, how gas can be brought to you for a song and how its multiple use can bring you more comfort and greater economy and make you extremely happy that you sought natural gas satisfaction without further delay.
