Meet a national resource named Steve

Steve is a cross-country track man, an artist, and an explorer of worlds that do not exist. That toothpick model is an attempt to study what lies beyond our three known dimensions.

At the 1966 International Science Fair, Steve won a ribbon for his theory of dimensions. But he didn't stop there. He believes the number of other dimensions is limitless, and is hard at work to prove it.

Why our interest in Steve? Because young people are our greatest national resource.

They deserve all the help they can get toward realizing their potentials.

Contributing to science fairs, providing scholarships and fellowships, refinery tours and geology tours, and teaching materials for schools, are just some of the ways our Company shows its active interest in today's young men and women.

Standard Oil is trying to help young people discover more about themselves... and the world they live in.
