Directly behind them are (l to r) Clyde Swisher, head of the NHS English department; Jim Ableman, student body president and Mrs. Harriet Brumbach, high school librarian.

Coyote Killed In Front Yard

Eddie Taylor, owner of Brownie's Lounge in Nyssa, reported he killed a big coyote in the front yard of the home where he lives with Jackie Simpson Thursday morning.

This would not be an unusual story in the backwoods country of the west but the residence is in a thickly populated agricultural area about eight miles SW of Nyssa.

Taylor said he had turned his poodle dog out earlier and it woke him with its intense, excited barking about 6 A.M. and he wouldn't believe his eyes when he looked out the window and saw two big coyotes. Clad in his "shorts" and barefoot he said he got a 30-30 rifle and sneaked around the corner where he was only 30-40 feet away and let the varmint "have it". He said he discovered he only had the one shell in the rifle and never had a chance at the other one.

Simpson, who has lived in the same location a number of years said he had never known of coyotes being in the area before. He was not home at the time of the shooting.

Mrs. Leslie Burbank, Nyssa, has been identified as the lady holding the six pound, 24 inch rainbow trout caught at Malheur reservoir on opening day last Saturday. The little lass showing open-mouth amazement is her three year old granddaughter, Alisa Allen, daughter of Mr. and Mrs. Alvin Allen, Nyssa. In spite of inclement weather more than 600 anglers were reported to have been catching limits of fish ranging from 8 to 12 inches in length.

SAVE COSTLY CULLS

Control wireworms in potatoes with Niran 10-G

Wireworms can damage potato seed pieces and infest growing tubers, resulting in heavy culls and substantial crop losses.

Niran 10-G, the powerful granular insecticide developed by Monsanto, controls wireworms . . . minimizes costly damage. And Niran 10-G is versatile. You can broadcast and incorporate it before planting, or you can band-apply Niran 10-G at time of side

dress fertilizer application. Either way, you get low-cost, efficient protection against a tough and costly pest.

Follow directions carefully and you'll have far fewer culls and a more marketable, more profitable potato crop. Get all the facts from your local farm chemical dealer. Or write: Monsanto Company, Agricultural Division, St. Louis, Missouri 63166.
