Guidance Director Lists Counselors; Tells Duties

With the start of the new school year, Nyssa high school students are being introduced to their various class counselors who are assigned as a part of the guidance program at NHS. The counselors will assist students with school adjustment problems during the 1967-68 school year.

Charles Quinowski, guidance director, announces that Ralph Aldrich and Miss Hannah Lindbloom are serving as counselors for freshman students, with Dale Schraufmagel and Gary Sant acting as sophomore counselors.

Assisting juniors with counseling problems are Kinsey Keyeren and William DeLong, while George Fanning and Don Bates are counseling the senior students.

Guidance Director Quinowski explains the structure of the guidance program as being inherent in the total educational process, with the teacher-pupil relationship being the strongest single element.

In grades one through six, guidance is the function of the homeroom teacher, with assistance from the principal, parents, special education department, special health agencies and state consultants.

In grades seven through 12, he explains that guidance is still an integral part of the classroom instruction. Routine and special guidance activities are planned and organized by the guidance coordinator, under direction of junior high and high school principals.

Guidance is viewed not as a way to lift responsibility from the student and to make decisions for him, but as a way to teach him to accept responsibilities and to make wise choices.

All guidance activities are so designed as to lead the student to assess his own potentials, his strengths and his weaknesses. He is encouraged to look both forward and backward, to profit by his mistakes, to understand the purpose of his education and its value to him.

MR. PRESIDENT: "SUE FOR PEACE"

This War on Poverty is no war against need. Few Americans are starving. The anti-poverty programs were designed to destroy a more subtle evil - the poverty of opportunity.

There are 32 million poor in our country, one out of every six Americans. They have incomes that would mean comfort in most parts of the world, but incomes that in the United States give them but minimal existence. The poor are cut off by their economic inability to compete with the rest of us for housing or medical care and legal help. Geography also cuts them off. Their inability to move out of their present surroundings is the clincher.

Imagine yourself residing in a depressed area with a family, no transportation, no money to move your belongings, no borrowing power. Truly you are then a victim of your own environment with no way to go.

President Lyndon Johnson announced in his first state of the union message, "This administration today, here and now, declares unconditional war on poverty in America." But it is three years since, and his anti-poverty program has never gained popularity with the American people. Its opponents do not march nor demonstrate. They merely remain indifferent.

Maybe it's time to re-evaluate the program from top to bottom. Mr. President, sue for peace, examine your gains, calculate your failures and go off another tack to get the job done. - (Courtesy of Blue Mountain Eagle, John Day, Ore.)

ONTARIO BODY ASKS REVIEW OF FAIR PLANS

A joint meeting with the Malheur county fair board was set at the August 28 session of the Ontario chamber of commerce.

A discussion of the county fair, its needs and goals, occupied those at the meeting. Several chamber members said there is a vacuum in fair entertainment, but the county enjoys a strictly fair program.

A carnival or midway for rides and concessions is seen as an important supplement to the county fair.

Members of the fair board will be asked to attend the chamber meeting on Sept. 11 or 18 for a general review of the fair program. - Argus Observer.
