The three door sedan.

This Volkswagen has a door on the left to let in the driver. (That's one.) A door on the right to let in the passengers. (That's two.) And a door in the back which is like the tailgate of a conventional wagon. (That's the third, and do you need any more than that?)

To look at it, you'd swear our Squareback is a station wagon. But it really isn't.

Why? Well for one thing it doesn't cost like one. For another, it doesn't park like one. (The Squareback is only six inches longer than the bug. But has three times the storage capacity.)

And since it's a Volkswagen you can be pretty sure it'll use about half as much gasoline as the average wagon. (Our Squareback gets up to 27 miles per gallon.)

So if you're trying to decide between a station wagon and a sedan, why not get the best of two worlds? Buy the sedan that looks like a station wagon.
