DR. ROBERT BOND

Dr. Bond will be guest speaker at the Friday, March 29 dinner meeting of Malheur County Knife and Fork patrons. The dinner will be served at 7:30 p.m. at East Side cafe in Ontario.

The speaker might very well have been the subject of one of Horatio Alger's novels because of the way he worked himself through college.

In achieving both an AB degree from Wayne State university and later a BD from Oberlin college, Bond was in turn, a worker in an auto factory, a taxicab driver, a river boat employee and drove trucks for a mid-western firm.

All of this was before he decided to go into the ministry where, he says, "My various occupations have stood me in good stead in understanding

human behavior." Dr. Bond still shows signs of versatility and frequently admits to having an "itchy" foot. It has caused him to take trips to Latin-America like the one he just completed last summer and upon which he has geared his current address, "Through Latin - America on Fractured Spanish."

Vorlex[®]

IS BEST FOR POTATOES
and Vorlex users are the first to say so.

"Although 1967 was a year that produced some unusually poor potato crops in our area, we feel our 1967 potato yield and quality was substantially increased by our fumigating with Vorlex at 2 1/2 gallons per acre. We were certainly pleased with the results."

Robert S. Skyles
White Sage Farms, Inc.

"Row fumigation with Vorlex at 5 gallons per acre produced 100 sacks of potatoes per acre more than the untreated area. This is the highest yield I've ever produced (592CWT/A). And, the percentage of #1 potatoes was greatly increased."
