A regular savings account is another good financial umbrella for a rainy day.

**5% Deposit Certificates**—Here's how to earn even higher bank interest with any amount from \$500 up. A deposit certificate earns 5% per annum and matures in six months. You can arrange for automatic renewal at maturity.

**5% Income Certificates**—These pay you 5% interest which is guaranteed to the

two-year maturity date of the certificate. Interest is paid by check or deposited to your account each quarter. Or, if you prefer, you may purchase an income certificate which earns 5.22% when interest is compounded quarterly and the certificate is held to full two-year maturity.

**We'll give your crops a nitrogen boost... with versatile (USS) Anhydrous Ammonia**

Your United States Steel Farm Service Center can help you achieve higher yields and greater profits through the proper use of anhydrous ammonia — a concentrated nitrogen fertilizer that can give your crops a boost and can be applied in a variety of ways:

**SIDEDRESS:**

An excellent way to place a constant supply of nitrogen deep in the root zone where it is available when plants need it most for maximum growth and development.

**IRRIGATION:**

Anhydrous ammonia in water allows the grower to add needed nitrogen after crops are too tall to sidedress. Irrigation and fertilization are accomplished at the same time.

**PREPLANT:**

Anhydrous ammonia applied before planting gets started immediately — decomposing residues and releasing other plant food. It can be applied in either spring or fall and will not leach out of the soil.

**PLOWDOWN:**

A great way to get your plowing and fertilizing done at the same time. Saddle mounted tanks and trailing hoses in the furrows allow nitrogen to be placed deep in the soil.

The Soil Fertility Specialists at your USS Farm Service Center can provide the know-how and the equipment to give your crops a nitrogen boost when they need it — using versatile USS Anhydrous Ammonia.
