## LEGION TEAM

Nyssa's American Legion baseball squad has two remaining games this season.

On Tuesday, July 16, the local youth will travel to Vale, and on Tuesday, July 23 they will host the Borah lads.

## COW HOLLOW

The Cow Hollow team also has two remaining games, both on their home field.

They meet an Ontario nine today, and on Monday, July 15 will play Nyssa team number 1.

## Playoff Games Set For Elks' Babe Ruthers

The Elks' sponsored Babe Ruth Vandal-Beaver All-Star playoff games are slated Thursday, Saturday and Sunday, it is announced by League Secretary Carl Lovitt of Adrian.

The first game will be at 8 p.m., this evening at the Harmon Killebrew stadium, Payette. Game number two will be at 8 o'clock Saturday evening on the Ontario junior high school diamond.

The third contest will be at 2 p.m. Sunday on the Vale high school field, with the final game to be played at 7 p.m. Sunday on the Nyssa high school diamond.

The all-stars are Babe Ruth lads from Adrian, Fruitland, New Plymouth, Nyssa, Ontario, Payette and Vale.

Coaching the Vandals are Jim Cody and Don Gozales, with Nyssans Chuck Michael and Duane Holcomb serving as Beaver coaches.

## Parentage Questioned

Who are his parents? A 485-pound bull calf that recently made the news when he was brought into the Madras livestock sale yard provoked this question.

It was speculated in a news story appearing with a picture that the animal, not quite a year old, was a cross between a Black Angus and an elk.

Credit was given the Oregon Department of Agriculture for having made a blood test that indicated elk blood in the animal, but State Director of Agriculture Walter Leth says the department cannot claim this credit for parentage determination.

"Our department is not equipped to make this type of blood test," Leth said, reminding that the department's laboratory work with livestock is for the purpose of disease analysis and control.

Interest generated by the story has resulted in the department's receiving requests for further information, but the director has found no record of anyone in the department having checked the animal's parentage. He thinks the department must have been confused with some other agency.

According to Leth freak animals are born somewhat as

## NFO Policies Aid Dairymen

New marketing procedures initiated by Idaho and Oregon N.F.O. cattlemen during the past thirty days are indirectly aiding N.F.O. dairymen in these two states, according to Robert Thompson, President of the Malheur County N.F.O.

Recent shipments of range cattle to midwestern packers by Washington County, Idaho N.F.O. members have shown favorable monetary gains. The biggest gains made were in the cutter-canner class, which has prompted the N.F.O. dairy committees in western Idaho and eastern Oregon counties to combine their efforts with the N.F.O. cattlemen, said Thompson. Thompson also revealed that more cattle are being shipped this week by Weiser, Idaho, and Ontario, Oregon N.F.O. members.

Hugh Kennington, Chairman of the Malheur County N.F.O. Dairy Board, has indicated that dairymen may gain ten to fifteen dollars per head for their cull cows. Kennington also noted that gains being made in milk sales will be revealed by Ed Graf, N.F.O. Director of the Dairy Dept., at a public meeting to be held Wednesday, July 10, at 8:30 p.m. at the La Paloma restaurant in Ontario, Oregon.

## "YOUR TOWN"

If you don't like the kind of town, that this town seems to be, if buildings here are tumbled down a way you hate to see, if something isn't up-to-date or good as things of old, while other towns are simply great (or so you have been told); if you would like to see a place that's full of push and snap, a town that's on the map -- you needn't pack a trunk or grip and leave the folks behind; you needn't go and take a trip some other place to find; you needn't go and settle down where friends of old you'll miss; for if you want that kind of town, just make it out of this?

## ON CHOOSING MEN AND BOOKS

If you would choose the choicest book, select the one that's soiled and worn; and as you finger through its leaves you'll see how they are curled and torn.

The book, by use, acquired these marks, which show on every leaf and page that eager eyes have scanned the text to garner wisdom for the age. Then if you'd choose the choicest man, select not one who's prude and prim, but pick the man who shows some wear, and hast the marks of use on him.

genetic accidents and this could be one answer to the reason for this unusual specimen.

His own interest stirred by the story and curious as to whether such a cross is possible, Leth conferred with Dr. James E. Oldfield, head of the animal science division, Oregon State University.

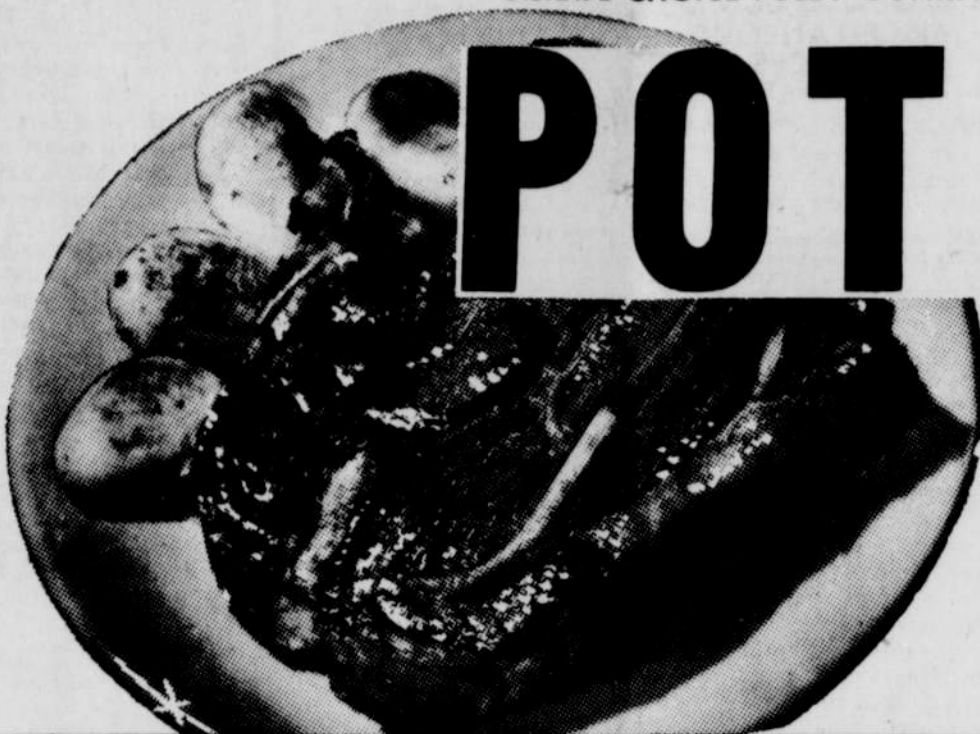

Dr. Oldfield said it might be possible, but indicated he had never known of its happening. Oldfield also confirmed that blood tests could be made that would aid in determining the parentage and said OSU was equipped to make this type of test.
